**FOR IMMEDIATE RELEASE**

**RASIRC Ranked #1024 on Inc. 5000 List of Fastest Growing Companies  
*297% 3-Year Revenue Growth Validation as a Technology Innovator***

**San Diego, Calif. – September 27, 2011 –** [RASIRC](#)<sup>®</sup>, the steam purification company, announced today that the company ranked #1024 in the Inc. 5000, a prestigious list of the fastest growing companies in the nation. RASIRC ranked #31 in the manufacturing segment, #178 in California and #21 for the San Diego region with 297% 3-year revenue growth. [RASIRC products](#) deliver ultrapure water vapor for photovoltaics, nanotechnology, semiconductor, and other manufacturing applications.

“Our rapid growth proves the value customers see in our innovative steam purification and humidification products,” said Jeff Spiegelman, RASIRC president and founder. “We have developed the first purifier for steam since the beginning of the industrial revolution. This has powered us into a top 40 finish in the domestic manufacturing segment. To grow at that rate during an economic downturn shows just how our products are fulfilling a real need.”

This is the first time that RASIRC has been ranked in the Inc. 5000, but not the first time for Spiegelman. Prior to RASIRC, Spiegelman founded [Aeronex](#), which was ranked #142 on the 1997 list and was later sold to [Entegris](#) (ENTG) in 2003.

Complete results of the Inc. 5000, including company profiles and an interactive database that can be sorted by industry, region, and other criteria, can be found at [www.inc.com/5000](http://www.inc.com/5000). The RASIRC profile can be found at <http://www.inc.com/inc5000/profile/rasirc>.

"Now, more than ever, we depend on Inc. 500/5000 companies to spur innovation, provide jobs, and drive the economy forward. Growth companies, not large corporations, are where the action is," says Inc. magazine Editor Jane Berentson.

**About RASIRC**

[RASIRC](#) products purify and deliver ultra-pure liquids and gases. RASIRC technology is the first to generate ultra-high-purity (UHP) steam from de-ionized water. It reduces cost, increases

yield, and improves safety. RASIRC dryers, [humidifiers](#), and [steam generators](#) are of critical importance for many applications in the semiconductor, pharmaceutical, medical, biological, fuel cell, and power industries. Custom systems are available upon request. Call +1-858-259-1220, e-mail [info@rasirc.com](mailto:info@rasirc.com), or visit [www.rasirc.com](http://www.rasirc.com).
